

FLOWER CARE

Cut Flowers or Bouquet Arrangement - Display in a cool spot away from direct sun, fan, and fruit bowl. Select a vase to suit the bunch/bouquet and add water to half stem length. Trim flower stems by 1cm at 45° angle; remove leaves which may contaminate water and place the flowers in the vase.

Every two days, remove outer petals or stems as they spoil; repeat trimming stem length, clean the vase and half-fill again with fresh water. Vase Life and water needs vary by season and flower type.

Box Arrangement - Simply add a little water every day at the back of the box - adjust the amount of water for the weather and remove outer petals or stems as they spoil. Most flowers also respond well to misting.

Thank you for supporting Australia's flower industry. Roseburra Flower Farm and Yungaburra Village Flowers are proud to serve you and hope you enjoy our products.
